

Siebert Calcium EP multi-purpose grease: the price-stable alternative

It has long been known that when it comes to reliable multi-purpose greases, many users rely on lithium-based products. The reason for this is that their properties and performance make them the preferred choice for many applications (for example, in construction equipment, slewing bearings on cranes and in the lubrication of pump and press bearings). However, current developments on the raw materials market show a significant rise in prices for lithium — a trend that is set to continue, according to the estimates of many experts.

Calcium: price-stable, powerful and future-proof

Our R&D department has thought ahead, so your customers can continue to keep costs low when budgeting for their lubrication tasks. Our solution is the new calcium-based Siebert EP multi-purpose grease 4945, which is completely free from lithium. The big advantage is that, thanks to its calcium base, your customers remain fully independent from the market trends of lithium. This means that the multi-purpose grease is a long-term, price-stable alternative.

An added benefit is that users do not have to sacrifice performance and quality when using Siebert calcium multi-purpose grease EP 4945 — the new product can do anything that a lithium grease can do. This we guarantee, with our decades of research expertise.

Siebert Calcium multi-purpose grease EP 4945

- Is extremely water-resistant
- Seals well
- Has excellent adherence
- Can be used at the same temperature as lithium greases

Can be used for many industries and applications, for example:

- Construction and agricultural equipment, industrial forklift trucks
- Lorries
- Cranes
- Mining
- Shipping (locks, ports)
- General roller bearing applications

Future-proof

By using Calcium multi-purpose grease EP 4945, you are working with a focus on the future. You remain unaffected by the fluctuations of the lithium market, while at the same time retaining all the familiar performance of lithium greases. Want to know more about our future-proof alternative? My team and I will be happy to help you!

We are there for you
